

8 July 1921

**CHURCH NOTICES**  
**FIRST METHODIST CHURCH.**  
Rev. E. R. Mason, Pastor.  
Services: Preaching Sunday 11:00 a. m. and 8:00 p. m.  
Sunday School 10:00 A. M.  
Epworth League, 3:30 p. m.  
Prayer meeting Wednesday evening 7:00 o'clock.  
**FIRST BAPTIST CHURCH.**  
Rev. J. S. Corpening, Pastor.  
Preaching—11:00 A. M.  
Sunday School—10:00 A. M.  
Evening Service—8:00.  
**GRACE METHODIST CHURCH.**  
Rev. F. V. Robertson, Pastor.  
Preaching every Sunday night at 7:15, and every second Sunday at 11 a. m.  
Sunday school at 10 a. m.  
Prayer meeting every Wednesday evening.  
Mid-week services—Wednesday 8:00 P. M.  
**PRESBYTERIAN CHURCH.**  
Rev. R. W. Jopling, Pastor.  
Sunday school 9:45 A. M.  
Morning Worship—11:00 A. M.  
Preaching 11 A. M.  
Evening Service 7:30.  
Prayer Meeting—Wednesday, 7:30 P. M.  
**A. R. P. CHURCH.**  
Rev. W. S. Patterson, Pastor.  
Sabbath School—10:00 A. M.  
1st and 3rd Sabbaths.  
Evening Worship—7:30.  
Mid-week Worship, Wednesday—7:30  
A hearty reception awaits you at all of these services.  
**SECOND BAPTIST CHURCH.**  
Rev. T. H. Roach, Pastor.  
Sunday School—10:00 A. M.  
Preaching—11:00 A. M.  
Evening Service—7:30.  
Prayer Meeting—Wednesday night, 8:30.  
**CHRIST EPISCOPAL CHURCH.**  
Rev. Rufus Morgan, Rector.  
Morning Service, every third Sunday—11:00 A. M.  
Evening Service, every third Sunday—8:00.  
Mid-week Services, Wednesday night—8:30.  
Sunday School every Sunday—10:00 A. M.  
**AMBASSADOR GIVES RECEPTION IN PERU**  
Lima, Peru, July 7.—The United States ambassador, William E. Gonzales, gave a reception today in honor of the Fourth of July, which was attended by President Leguia, the members of the Peruvian cabinet, government officials and the diplomatic here. The American Society of Peru gave a banquet tonight.  
**Oppose the Nelson Bill**  
Washington, July 7.—Attorneys representing various individuals and corporations facing prosecutions instituted by the United States appeared at a department of justice hearing today to oppose the Nelson bill, which would extend the jurisdiction of federal courts to permit individuals indicted in any judicial district to be brought there for trial without preliminary hearing in the district where they reside.

**ROAMED THE TEXAS PLAINS**

**Elephants of Gigantic Size Once Had Their Habitat in That State, Millions of Years Ago.**  
Positive proof that elephants of gigantic size, with bodies probably covered with long hair, once roamed the coastal plains of Texas, has just been obtained by the unearthing of the skeleton of one of these prehistoric animals at San Leon. The period of its life dates back anywhere from one-half million to seven million years, according to H. O. Chandler, assistant professor of biology in Rice Institute of Houston, who assisted in removing the remains of the elephant from the hard bed of sand and gravel where it reposed through the centuries.  
It will take some time to reconstruct the bones and form the skeleton as it originally existed and until this is done measurements cannot be accurately taken. The fact, however, that the two tusks which were removed from the sand and gravel bed are each more than 12 feet long indicates the great size of the pachyderm. The skeleton was discovered by E. T. Roy of Houston who called Mr. Chandler to his assistance in unearthing it. In speaking of the discovery Mr. Chandler said:  
"This particular species of elephant was common in North America in the early and middle portions of the age in the geological history of the world which is known as the pleistocene. In the latter part of the pleistocene period it had already become extinct.  
"There are 20 known records of the occurrence of the Imperial elephant in Texas, one being in Matagorda county. This species of elephant was typically a plains animal, apparently shunning forest regions and occurring only west of the Mississippi river.  
"The Imperial elephant is the largest known species of elephant that ever lived on earth. Full-grown specimens reach a height of 13½ feet, while modern elephants seldom exceed 11 feet in height. It is probable that the Imperial elephant, like the mammoth and the Columbian elephant, was clothed with long hair, for during the pleistocene period the winters were severe over most of the regions which it inhabited."  
**Why Shouldn't He?**  
Fred B. Johnson, one of the Indiana state public service commissioners, is a Jeffersonian Democrat, and is, in fact, quite democratic in his personal habits. When he drives along the street, away out in the north part of the city, where he lives, and sees some one waiting for a street car he cannot resist offering to share his silver—not in any spirit of unfriendliness to the street railway system, but for reasons of his own.  
Not long ago he invited a matronly woman to ride, and she accepted, and they started toward the downtown district. Nearing Ohio street, where Mr. Johnson usually turns out to his office in the state capital, he advised the woman that he would turn west there.  
"But I want to go to the Fletcher American National bank," said the woman.  
Very graciously Mr. Johnson drove down Pennsylvania street and was about to stop on the west side of the street, when the woman told him to cross the street and draw up alongside the bank corner.  
Somewhat amazed, the commissioner-driver complied and put down his passenger in the proper place.  
Then the woman drew out her purse and gave Mr. Johnson five cents.  
He took the money and drove on.—Indianapolis News.  
**Ad Filled Romance Want.**  
A war romance by way of the "personal" classified advertisement columns of a London daily paper has just been consummated.  
It is the story of an Australian ex-servant, who, after having won the D. C. M. and the M. M. at the front passed through Birmingham in 1918 en route to a demobilization camp. On a railroad station platform he talked with a pretty girl for 15 minutes, and the Australians being quick workers—received a gift of a lock of hair before he left. He did not learn the girl's name, however.  
Returning to Australia, he moved to Tasmania and from there wrote the chief constable at Birmingham, saying that he had fallen in love with the girl, and asking aid in finding her. An advertisement was inserted in a London newspaper, the girl saw the "agony column" notice, photographs were exchanged, and in a few weeks she sailed for Tasmania.

**GREAT WASTE DUE TO RUST**

**Almost Incalculable Damage Is Done Yearly by Its Attacks on Metals of All Kinds.**  
The greatest waste in the whole world is rust. It costs Great Britain alone \$32,000,000 yearly, according to London Answers.  
When the oxygen of moist air combines with the sensitive surface of a metal it produces an oxide. This is rust and nothing else.  
Aluminum is the only metal that will not rust. Gold is generally taken to be a rustless metal, and it is true that it will not combine with oxygen of itself—without aid, that is. Given the aid, it will rust.  
Ornamental steel—that with a purplish or lilac color—is the worst rust, because the color tinge has been produced by part oxidation and the process begun artificially is continued naturally.  
Dry air will cause rust, but the metal has to be at high temperature. A poker which has been made red hot will rust when it cools. Grate bars do the same. The flakes that come from red-hot iron when it is hammered are but rust.  
The best preventive of rust is fat-oil varnish (one part) mixed with rectified spirits of turpentine (five parts) and applied with a sponge. The highest steel polish on mathematical instruments remains absolutely unaffected if this solution is applied.  
Tinware is rendered practically immune from the rust flend if when new the ware is smeared with pure lard and baked in a hot oven.

**SPORT ADORED BY FILIPINOS**

**Cock Fighting the One Occupation That Appeals to the Heart of the Brown Brothers.**  
In every one of the larger cities of the Philippines and throughout every one of the thousands of little barrios—from northern Luzon to southern Mindanao—little barrios that fringe the ocean's edge or nestle among the hills, there is but one universal and adored sport, but one game that is pre-eminently popular from the mountain fastnesses of the headhunters to the southern shores of Moroland, and that is cock fighting.  
Every Sunday morning—for Sunday is the great day for the sport—at the first crack of dawn along the roads and trails that lead into the little settlements and on the streets that twist through the smelly and ramshackle barrios, will be met numbers of Filipinos walking with a quick, jaunty step, anticipation written plainly upon their brown faces and an unusual light in their dark eyes. Each carries his favorite game cock under his arm, and all are converging upon the cockpit.  
**Facing Buildings With Pottery.**  
In a recent lecture before an English gathering Prof. Beresford Pite discussed the possibilities of ceramic products in the clothing of reinforced concrete skeleton buildings. Unlike many architects who regard traditional practice as something quite sacred, Professor Pite would throw the conventions of the past to the winds in order to meet modern developments. While admitting the structural advantages of reinforced concrete, he is not an admirer of concrete as a material for exterior surfaces, and advocates the clothing of the structural skeleton with "a garment of permanent, effective, beautiful, ceramic color, unlimited in its variety and worth."—Scientific American.  
**Those Old-Time Workers.**  
"When I was a boy," said Mr. Cumrox, "I worked 14 hours a day."  
"No, you didn't," replied Mr. Casius Chex. "My father was keeping the store you worked in. You just hung around 14 hours a day because it was a warm, comfortable place to loaf."

**NEBULA SHOWS SOME SPEED**

**Body Flying Through the Heavens at Rate of Two Thousand Kilometers a Second.**  
The Lowell observatory in Flagstaff, Ariz., has held a stop watch on the fastest moving object ever discovered. The spiral nebula catalogued as No. 554, Dreyer's catalogue, constellation of Cetus, is flying through the heavens at the rate of 2,000 kilometers a second. An airplane going at this speed would circumnavigate the earth at the equator in less than half a minute. The spiral nebulae are the swiftest moving objects in the known universe, but no one has ever before been detected shooting through the heavens at much more than half the speed of 554-Dreyer-Cetus. Most stars move slowly and sedately along at about 100 kilometers a second. What is perhaps rather humiliating to us earth dwellers is the fact that 554-Dreyer-Cetus is moving in the direction away from our own earth and sun.  
Of course the speed of light, which is nearly 300,000 kilometers a second, makes the speed of the spiral nebulae seem insignificant. But light does not have to "carry weight," whereas the nebulae, though perhaps an extremely diffuse and tenuous form of matter, are none the less material objects of quite considerable ponderosity. So, until we get later news from the celestial race tracks, we can state that the spiral nebula in Cetus is the speediest thing coming down the "celestial pike."—New York Independent.

**Went Bravely to Death.**

The nervous prisoner who ever went to the electric chair in Sing Sing was James L. Odell, convicted of murder, according to prison officials. Odell spent his last hours gazing at the picture of his baby, born after he had been sent to the death house, and whom he had never seen. He made no complaint. "We all have to pass through the experience called death," he told the keeper. "I have no fear. I am merely sorry that my life has to be wasted in such a manner." He walked steadily to the chair and was clear-eyed and without a pallor. In a clear voice he said: "Good-by, gentlemen." He refused any drugs to bolster up his nerves and held out his hand, saying: "I am as steady as a strip of steel."

**She Wants to Know.**

"Husband," said the professor's wife suspiciously.  
"Yes, my dear?"  
"What is this Violet Ray you are always talking about?"—Louisville Courier-Journal.

**Ships Out Sound.**

Persons who wish to concentrate their attention upon studies, business matters or what not, often find themselves most annoyingly distracted by noises of one kind or another. Street traffic may be disturbing; the crying of a baby may irritate, or perhaps the yowling of cats on a back fence or the persistent tooting of a cornet in the neighborhood may induce exasperation.  
To obviate this sort of trouble, Gabino Janregui of Bridgeport, Conn., has devised what he calls the "ear silencer."

**It Is a Frame of Light Construction**

which may be fixed upon the head in such a way that two screws carrying soft rubber plugs on their ends are inserted into the ears.  
When this adjustment has been made exactly right the two screws that carry the rubber plugs enter the wearer's ears horizontally and have only to be tightened sufficiently in order to fit snugly and exclude all troublesome sounds.

**Ships Long in Service.**

The vessels of past centuries had a career which seems to us moderns like the longevity of the patriarchs. The Princess Mary, which brought William of Orange to England, was in active service for more than 200 years. She was seventy-two years old when she arrived with the Dutch troops in Torbay. Under the name of Betsy Cairns she continued her labors after her two hundredth birthday in the transport trade between Britain and the West Indies, foundering at last off the English coast at the venerable age of two hundred and fifty years.

**Servants of the People.**

"I want to serve my country."  
"A praiseworthy ambition!" commented Senator Sorghum. "But you want to hear this in mind. A country is likely to be tremendously fault-finding about the service and not a bit liberal when it comes to tips."

**NO REST---NO PEACE**

There's no peace and little rest for the one who suffers from a bad back, and distressing urinary disorders. Lancaster people recommend Doan's Kidney Pills. Ask your neighbor for guidance by their experience.  
S. D. Taylor, farmer, Lancaster, says: "Several years ago I had a slight attack of kidney trouble. My back bothered me a great deal and it was terribly sore and lame. The kidney secretions passed irregularly and I had to get up often at night on that account. I heard Doan's Kidney Pills highly recommended so I got some and they relieved me of all the trouble."  
60c. at all dealers. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

**KU KLUX KLAN WIZARD SPEAKS TO BIG CROWD**

**W. J. Simmons Declares the Organization Is Not a Sectional Affair**  
Greensboro, N. C., July 4.—About 5,000 people gathered at the fairgrounds Friday night to hear W. J. Simmons, Imperial wizard of the ku klux klan, discuss the past, the present and the future of the organization. About 225 men clothed in the robes of the order marched into the fairgrounds and took their seats among those of the audience. Mr. Simmons was introduced by Rev. George R. Brown, of High Point, who declared that he had been informed unofficially that High Point is the home of one of the largest klans in the entire country.  
Mr. Simmons declared that the klan is not a sectional organization; that it is one which covers the entire nation; the members of the order, he said, are not limited to any one state but members may be found in all states. The principles of the klan, he declared, were not first known during the time immediately following the war between the states. The Mecklenburg declaration of independence, he stated, marked the first display of the spirit of the organization in America.  
Had the organization not taken charge of the situation which developed immediately after the Civil war, declared the speaker, the American people today would be a race of mongrels. The klan, according to the speaker, does not desire to intimidate negroes; it merely wants him to keep his place. Financial aid has been given to worthy negroes out of the money in the treasury of the organization on many occasions, he declared. There are only three kinds of people fighting the klan, stated Mr. Simmons, and these are "black negroes, yellow negroes and white negroes."  
He declared that he had no apology to make for the restriction of membership due to religious beliefs. If a man does not accept the teachings of Jesus Christ, he stated, he does not belong to the klan and the organization does want him as a member.  
The old organization which was formed during the reconstruction days in the south was disbanded in 1871, declared Mr. Simmons, and any disorders which took place after this organization was disbanded cannot be attributed to the band of men who saved the south from mongrelism. The recent disorders which have been blamed on the klan by many people were disclaimed. The location of every organization is known at headquarters in Atlanta, said the speaker, and some of these disorders took place 100 miles away from the nearest klan.  
The klan will not take the law into its own hands at any time, declared Mr. Simmons. The only time it will assist in running down law-breakers is when a request for its aid is made by officers of the law. It is not necessary at this time to attempt to enforce laws through private means, he stated; that condition has passed.  
Mr. Simmons was well received by the crowd. He spoke for more than an hour. About half of his audience left, however, before the conclusion of the address which began only a few minutes before 9 o'clock.  
Following the speaking at the fairgrounds the ku klux klan paraded

**ARMY SITUATION BRINGS PUZZLE**

**President Tells Congress Provision of Bill May Have to Be Modified**  
Washington, July 4.—President Harding informed congress today that while he had signed the army appropriation bill with its provision for a reduction of the regular army to 150,000 men by next October 1, it might be necessary to ask for a modification of the measure later to avoid embarrassment to the secretary of war.  
The executive declared in a special message sent to both the senate and the house that summary dismissal from the army of men who had enlisted for a longer period than October 1 would seem to involve a repudiation of a moral obligation by the government which would have its effect upon the morale of the army and possibly influence enlistments in the future.  
The nature of the modifications which might be asked for later was not disclosed, nor did the president explain how it was proposed to meet the moral obligation to the men and, at the same time, carry out the direction of congress to reduce the force by some 70,000 men in the next three months. He did say, however, that "every effort will be made to meet the requirement of congress at the earliest possible day."  
Secretary Weeks in discussing the bill today, said that if the war department succeeded in meeting the limitations imposed by congress some 30,000 civilian employees of the army besides the 70,000 enlisted men would be thrown on the labor market to complicate the unemployment situation. He added that an opportunity would be given enlisted men in the service who desire to leave to tender their resignations. In this way, he said, it was hoped to avoid forced discharges.

**MEXICAN PETROLEUM AT NEW LOW RECORD**

**During the Day Its Sales Approximated 65,000 Shares, One-Fifth of Exchange Turnover**  
New York, July 7.—Mexican Petroleum today extended its recent loss by 9 1-8 points to a new low record of 90 1-4, closing with a rally of one point. During the day its sales approximated 65,000 shares, about one-fifth of the entire stock turnover.  
Further selling of this issue was provoked by the withdrawal from the Mexican fields of virtually all the large foreign producers having interests in that country because of the noxious export tax.  
Pan-American Petroleum, which has a dominant interest in Mexican Petroleum, also was heavy, and shares of other oil companies in various parts of Latin-America lost ground. In contrast to domestic and European oil, most of which were inclined to strengthen.  
**Glass Washboards Lessen Friction.**  
A glass washboard, although it breaks more easily, is to be preferred to a metal one because the friction on the clothes is less. However, if a metal washboard is used it should be thoroughly dry before being put away, so that it will not warp or attract waterbugs.

**Tired**  
"I was weak and run-down," relates Mrs. Enla Burnett, of Dalton, Ga. "I was thin and just felt tired, all the time. I didn't rest well. I wasn't ever hungry. I knew, by this, I needed a tonic, and as there is none better than—"  
**CARDUI**  
The Woman's Tonic  
... I began using Cardui," continues Mrs. Burnett. "After my first bottle, I slept better and ate better. I took four bottles. Now I'm well, feel just fine, eat and sleep, my skin is clear and I have gained and sure feel that Cardui is the best tonic ever made."  
Thousands of other women have found Cardui just as Mrs. Burnett did. It should help you.  
At all druggists.

**16799 DIED**  
in New York City alone from kidney trouble last year. Don't allow yourself to become a victim by neglecting pains and aches. Guard against this trouble by taking  
**GOLD MEDAL HAARLEM OIL CAPSULES**  
The world's standard remedy for kidney, liver, bladder and uric acid troubles. Holland's national remedy since 1695. All druggists, three sizes. Guaranteed. Look for the name Gold Medal on every box and accept no imitation.

**Plumbing**  
When in need of work in our line it will pay you to let us estimate your work. We carry a full line of plumbing and heating supplies and can give the best of prices. Also Water and Sewerage Material  
**L. F. Waldrop & Co.**
